DETAILED ACTION

Election/Restrictions

1. This application contains claims 4-6 drawn to an invention nonelected without traverse in Paper No. 18. A complete reply to the final rejection must include cancelation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Objections

2. Claims 12-13 are objected to because of the following informalities: "tone off" (claim 12) and "adhesing" (claim 13) should be corrected. Appropriate correction is required. Furthermore, method steps should be positively recited ie. multi-piece packagings are releasably fastened to side walls of said transport box by attached perforated wall sections.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "and removing their longitudinal side walls from the longitudinal web" is confusing the bottle holders would thereafter not include side walls (after removal).

Claim Rejections - 35 USC § 103

Art Unit: 3721

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 7-9 and 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reichert (US 4,055,943) in view of Meyers (US 4,177,715).

Reichert discloses a method for packing containers 30 into open cases/transport boxes comprising loading bottles 30 through openings in collar/multi-piece packaging 95 into boxes 108; see figure 2.

Reichert does not disclose erecting the cases with releasably fastening a multi-piece packaging inside (adhering) to a flat lying box, however Meyers teaches construction and use of a collapsed flat lying blank with a multi-piece packaging 60 inserted; see figure 5. The combined structure undergoes folding and gluing operations and formed into a collapsed tubular blank. The blanks are then set up or erected before use. It would have been obvious to one of ordinary skill in the art to use a box erecting method as taught by Meyers in the invention to Reichert in order to save space.

Lateral walls are hinged to one another and folded about fold lines of sidewalls.

Regarding claim 9, multi-piece packaging is not releasably fastened on lid flaps however at the time the invention was made, it would have been an obvious matter of

Art Unit: 3721

design choice to a person of ordinary skill in the art to fasten the insert on lid flaps because Applicant has not disclosed that the particular box construction provides an advantage, is used for a particular purpose, or solves a stated problem. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with fastening to the sidewalls because the bottles are inserted equally well.

Regarding claim 11, the examiner takes OFFICIAL NOTICE that perforation lines provided in bottle packagings are well known in the art and would have been obvious to one of ordinary skill in the art to provide a blank with an insert with perforated sections.

Allowable Subject Matter

6. Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
